- Focus on Microsoft cloud applications
- Exclusive Sunrise 365[™] solutions

INDUSTRY EXPERTISE

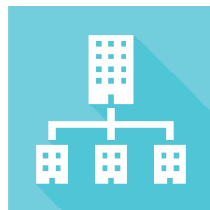

- Apparel
- Footwear
- Home Furnishings
- Consumer Goods
- Textile
- Manufacturing
- Distribution

Proactively ensure best practices, speed, and quality

Getting you live with Microsoft Dynamics 365 is at the core of our business. With hundreds of successful deployments and decades of experience under our belts we needed a way to deliver repeatable and predictable success “The Sunrise Way” —for every customer, every time. That’s why we created Sunrise 365 Quick Start, which bundles software and services into intellectual property you can leverage for new implementations or upgrade projects.

You’ll gain instant value and accelerate your Dynamics 365 deployment with industry best practices, processes and guides, preset configurations, and mappings. Plus, you’ll be able to ensure quality, accountability, and progress with an exclusive cloud-based project management tool that lays a strong road map for success.

From day one, your team can hit the ground running and start with a system that is ready for solution design with all the tools necessary to stay on track—ensuring maximum time savings and project success.

“We chose Sunrise because of their long history of successful implementations”

*Jake Boomer
IT Manager of Buck Knives*

Kick Off Your Project with Quick Start

Find out how fast and affordable deploying Dynamics 365 with Quick Start can be! Sunrise deployment and support regions are everywhere you do business across North America, Europe, and Asia. Let us help maximize your investment and meet your business goals at a tremendous value.

Industry Best Practices

- Leverage a complete content library of order-to-cash, procure-to-pay, warehouse, and other common processes
- Build on hundreds of guides and design documents
- Leverage decades of consulting experience

Preset Configurations

- Save time with load-and-go datasets pre-configured for your industry
- Speed up implementations with a complete library of 300+ configurations and mappings
- Make the entire process of migration and system set up easy and simple

Powerful Project Management

- Ensure a quality project that is on time and on budget with cloud-based tools that are accessible anywhere
- Follow a methodically detailed roadmap for success
- See progress with quantifiable metrics of task and milestone completion
